

New

Malossi **OVERRANGE** is renewed!

From now on all MALOSSI OVERRANGE will be supplied with Multivar 2000 MHR TEAM!
The new kits will be easy to recognize, since Multivar 2000 MHR TEAM is *black* owing to a treatment of hard *black anodizing*.

MULTIVAR 2000 MHR TEAM

The new 2000 MHR TEAM Multivar differs from the previous one by having a larger diameter hub. Increasing the diameter from 20 mm to 22 mm improves its linear motion, reduces friction and allows a linear gear change never achieved before!

TECHNICAL NOTES:

The kit contains a 99.5 mm diameter mobile half pulley made of a special cast aluminum alloy. The contact surface between pulley and belt is super-finished with a diamond tool to grant a constant coefficient of friction, calculated to prevent both belt slip and premature wear. To satisfy the innumerable adjustments required by racing scooters, depending on the track type and on the tuning of the engines, the new MHR TEAM Multivar is supplied with 2 sets of 6 rollers and a counter-spring in pre-hardened silicon-chrome steel alloy with counterclockwise winding (racing). In addition, other springs of the same class with different loads are available as options.
